

Cottonwood Heights

Weekly Update for July 23-29, 2017

City Manager

1. Very busy cataloging and posting BVDays photos. Also attended FEMA training at the State Capitol on Wed-Thurs. Sent the August newsletter to the printer.

Administrative Services

1. We gave the residents about 1200 of the remaining sandbags in flood prone areas. Worked with Public Works to remove the remaining bags from both staging locations.
2. Continue working on revision to Emergency Operations Plan.
3. The Cottonwood Heights Community Theater play, Annie started Friday, July 28. The final days of the play will be Friday Aug. 4th and Saturday August 5th.
4. Staff and their family gathered at Mountain View Park on Thur. July 27th for a picnic and romp through the splash pad before attending the Annie Producer's Preview later that evening. Thanks to everyone for attending and those that hosted the party.

Police

1. While doing selective traffic enforcement in a neighborhood, sometimes you catch more than speeders.

2. CHiPs put out additional officers on July 24th for fireworks. The citizens were great at voluntary compliance and we only wrote 3 citations. Assisted by raid we had no fires or events.

Community and Economic Development

1. The Planning Department set up a table at Butlerville Days to take public comment on Open Space in the city.

PHOTOS –

Figure 1 - So many parades and so many awards. It's been a great summer and we appreciate everyone that has contributed to that success with our float

Figure 2- The Sandy City Mayors award from earlier this summer.

Figure 3- And the Governor's Award from the Days of '47 parade on July 24th

Figure 4 - The collection of awards from the Days of '47 parades for the last three years

Figure 5 - Ann and Shelly have put together a wonderful display in the foyer of City Hall showing all the work that goes into building a float

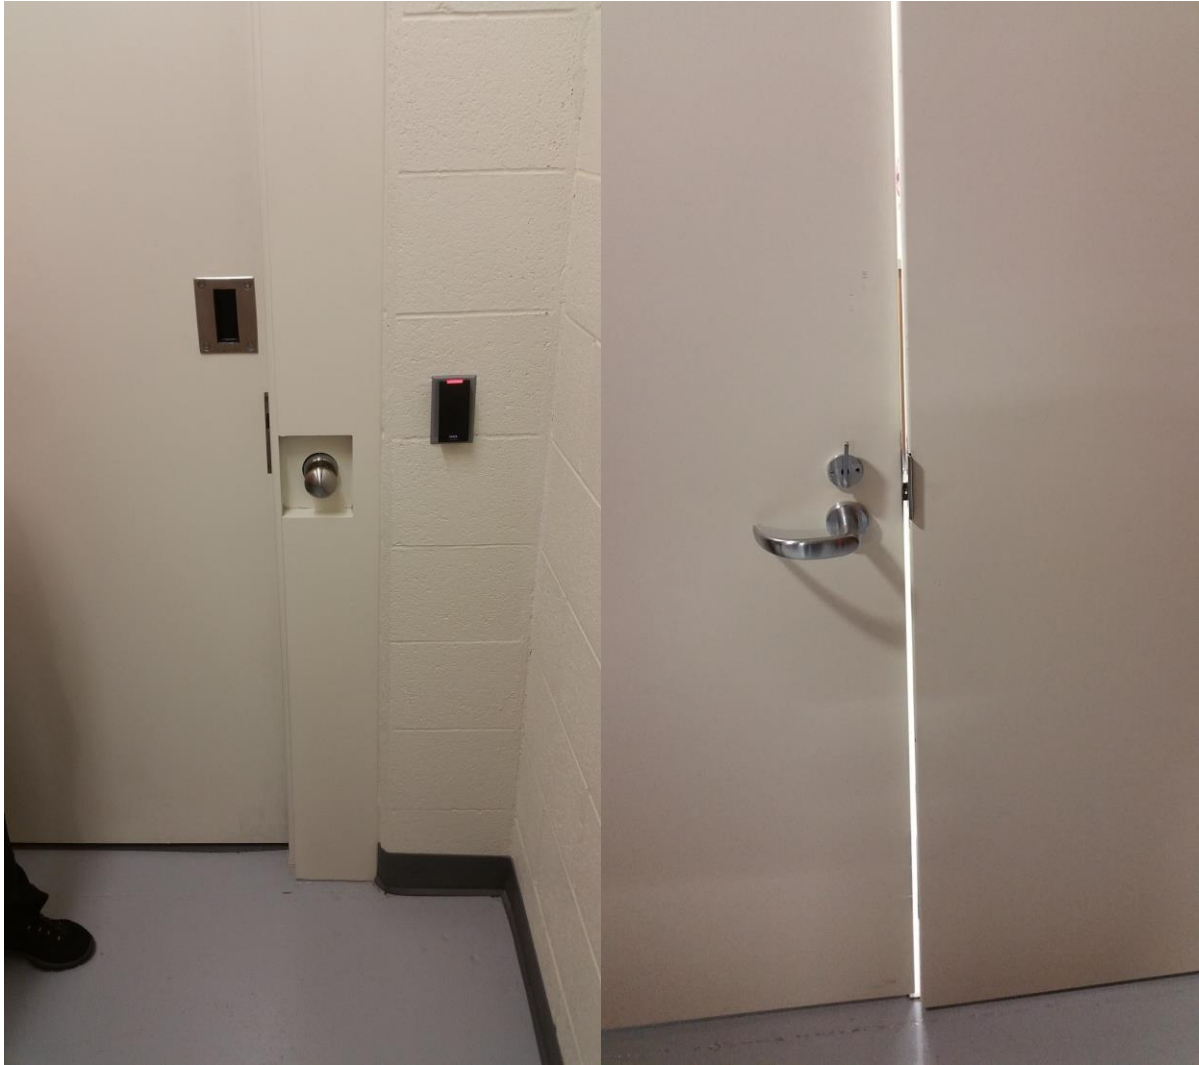

Figure 6 - Staff worked together to correct some door security in the evidence storage room. While it was installed per the plan we discovered that it didn't function well. By staff solving the problem we saved hundreds of dollars over paying the contractor

Figure 7 - Staff is preparing the TRCC grant to include a bathroom expansion project at Mountainview Park

Figure 8 - This is the future pad for the fuel tanks on the UDOT property

Figure 9 - This is the slab for the detention basin on the UDOT property
